YS-110 FZ

The YS-110 FZ is the same physical size and weight (1.61 lbs) as the YS-91, yet produces > 8% more power. The proven fuel-injection system is powered by crankcase pressure. The disc valve system and the dual throttle valve help supercharge the fuel mixture creating unequalled power and performance. The YS-110 FZ simply provides the best power-thrust to weight ratio of any 4-stroke engine in its displacement range. CNC machining assures power consistency between engines and perfect fitting replacement parts. A two-needle carb with regulator adjustments is standard. Of all the 4-strokes, tested on the CrossFire and Bampf 3-D Extreme, the YS-110 is the Optimal match for superb flight.
